## Go ahead with Flipping Teachers - learn how to flip your class

After 12 months of preparation, the Flipping First team has developed a teacher training course to equip teachers with the skills and 'know-how' so they can flip their classroom.

The course - Flipping Tools and Techniques for Teachers - includes videos and practical resources enabling teachers to master some key tools and techniques needed for effective flipped classrooms.

Starting with the basics, the modules explain what a flipped classroom is and which tools to use to create great lessons. Teachers will learn how to plan, implement and evaluate flipped classes. In a world

where technology in the classroom is the norm, the course explores how to use e-portfolios tools such as Mahara. It also looks at how to use video-based tools such as Camtasia, Prezi and Videoscribe – all of which can help to bring learning to lie as a rich, interactive and engaging experience.

On completion, teachers will be able to deliver two courses prepared by the Flipping First team.

The first course is called An Introduction to Entrepreneurship.

The second course is called An Introduction to Tourism.

Using the prepared flipping materials and resources with their own

students, teachers will quickly discover the power and effectiveness of this popular teaching methodology. At the end of the teacher training, teachers will be well placed to develop their own flipped classes.

By completing the teacher training course, teachers will benefit from the shared experiences of teachers in Hungary, Poland, the Netherlands, Belgium, Spain and the United Kingdom. To find out more how you can reserve your place on the Flipping Tools and Techniques for Teachers contact your national Flipping First Partner.

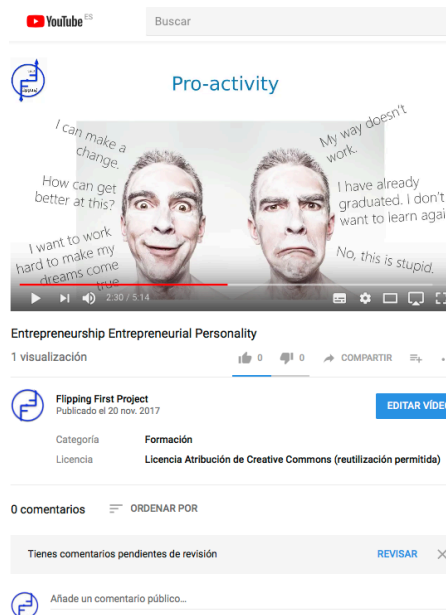

## Tourism and Entrepreneurship Get online and individual started

Do you want to learn more about tourism and entrepreneurship in an attractive and accessible way, then you can follow these courses online.

The material consists of several videos, related to these topics and enhance your knowledge, skills and independence. The goal is to inspire you to start up a company and/or to get started in the sector of tourism.

And you may also used them with your students

After you practice the flipping methods and the tools practice using them with your own students. We will provide you with the flipped classroom resources for two courses:

An Introduction to Entrepreneurship and Tourism, but you might also create your own or find other to use.

Check with your National Partner how can you get involved in the project!!

## The partners

### Foundation Knowledge Center PRO WORK

Foundation PRO WORK promotes the career development of people with a (significant) distance to the labor market, skilled workers and others who need coaching, training and counseling in a wide variety of sectors and topics, national and international.

PRO WORK operates in sectors like ICT and technology associated with inclusion, employment, entrepreneurship, talent development of youngsters, unemployment and generation gaps. It has enabled the development of a broad range of methods, instruments and techniques, both on operational and political levels. The organisation draws on a consortium of companies, training centres, government (local, regional, national and European), target group representatives, sectoral representatives and knowledge centres. PRO WORK offers a broad professional resource that responds to structural innovation in a demand driven way.
