Fruitful staff training in Madrid. Using Flipping tools and working the methodologies

## The Flipping First Handbook A practical guide to flipping your class

Flipped learning is not complicated. However, to be effective you need to understand what it is and the differences between the flipped classroom and the traditional classroom. Everything you need to know is in the Flipped Class Handbook which is now ready for use in the next phase of the project.

“We wanted to make the Flipping First Handbook as practical and as helpful as possible. To achieve this, we have included lots of ideas, tips and tools that teachers and instructors can use when planning their flipped classes”, said Anne-Marie Daly from the UK partner Exponential Training.

In addition to defining what a flipped class is and is not, the Handbook contains checklists and ‘how to guides’. It also includes links to a lot of invaluable tools and resources that can provide inspiration and ideas on making the flipped class interactive and engaging.

One such tool is EDPuzzle (<https://edpuzzle.com/>) – a simple on-line tool which makes it easy to engage students using self-paced, interactive lessons by adding with videos by voice overs and questions as part of pre-recorded videos. “One of my favourite tools is the worksheet for preparing what students will do

before, during, and after the flipped class – it really makes you think about your class at the planning stage which is so important”, added Anne-Marie.

Another part of the Handbook, explores three ways to use flipped classes:

- The whole class model,
- The carousel model
- The managed homework model.

To find out more about these models, why not get involved in Flipping First by contacting your Flipping First National Partner!

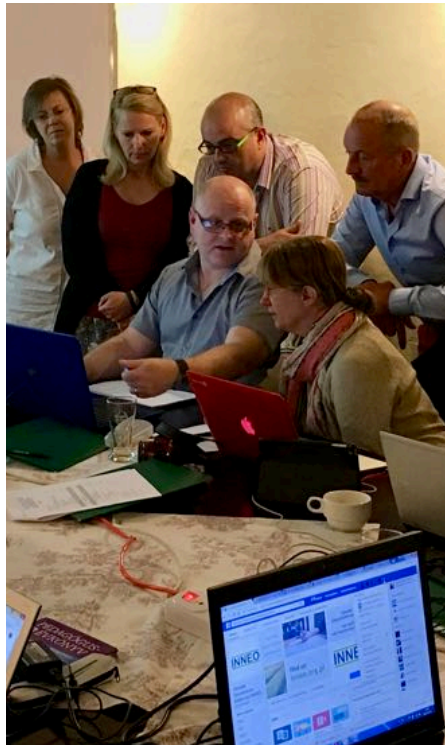

## Teachers training flipp your classroom

- Are you ready to flip your class?
- Want to learn about the existing possibilities to do it?

From mid September you can join us, and have access to our online training and start to prepare your flipped classrooms with us. You will learn about the methodology, but also about the tools you may use to create your resources.

We will also get access afterwards to resources for Flipping your classroom with your students in Tourism and Entrepreneurship.

Join us and you get access to our project platform to use it with your students and experiment how to work with an LMS linked to an ePortfolio.

New evaluation with social relations among your students for a flipped classroom experience. And everything will be free.

Contact now your country partner in the project.

## The partners

### The Center for Training and Research INNEO

# INNEO

The Center for Training and Research INNEO is the association based in Rzeszow (Poland).

The main activity of INNEO is training and research in the area of entrepreneurship and labour market. Members of INNEO have implemented training on local level for young people (subject: entrepreneurship, founding business, writing business plan) and also for adults who were unemployed (subject: computer service training, external and internal customer service, time management, team management).

INNEO is involved in several Erasmus+ projects concerning entrepreneurship, leadership, creative industry and supporting young people on labour market.
